Aim and Scope

MONAMI 2009 aims at bringing together top researchers, academics and practitioners specializing in the area of Mobile Network Management (MNM).

Multiaccess and resource management, mobility management, and network management have emerged as core topics in the design, deployment and operation of current and future networks. Yet, they are treated as separate, isolated domains with very little interaction between the experts in these fields and lack cross-pollination. MONAMI 2009 offers the opportunity to leading researchers, industry professionals and academics around the world to meet and discuss the latest advances in these areas and present results related to technologies for true plug-and-play networking, efficient use of all infrastructure investments, and access competition. The aim of the forum is to disseminate the latest innovative mobile network solutions for increased competition and cooperation in an environment with a multitude of access technologies, network operators and business actors.

MONAMI 2009 invites papers that follow either evolutionary approaches based on current IP-centered architectures or introduce revolutionary MNM approaches and new paradigms. Papers reporting experimental and empirical studies as well as implementation/industry results (including testbeds and field trials) are also welcome.

Topics of particular interest include, but are not limited to, the following:

- · Multiaccess networks and resource management
- Energy efficiency for multiaccess networks
- Security solutions for managed and infrastructureless networks
- Emerging and visionary multimedia services, service enablers and management
- Identity management for mobile users
- Multimedia services in mobile/multiaccess networks
- Business models and Economics for a mobile/multiaccess world
- Future Internet architectures for Mobile Network Management
- Autonomic computing and self-management
- Management standards and enabling technologies, including IEEE 802.21
- Design, implementation, and testbed/experimental evaluations

Paper Submission

We encourage submission of high-quality technical papers reporting original material that is has not been previously published, or is not currently submitted for consideration elsewhere. Full Papers should not exceed 12 pages in the Springer Lecture Notes of ICST (LNICST) style and must be submitted by 17 May 2009. Short papers of up to 8 pages, reporting most current results, are also solicited.

All submitted papers will be peer-reviewed by at least three independent reviewers, including a TPC member to ensure high quality and relevance to the topics of the Conference. All accepted papers will be published in the Springer Lecture Notes of ICST series and then be included in major article indexing services.

For detailed paper submission instructions please visit the conference website at http://www.mon-ami.org/submission.shtml

Steering Committee

Chair:

Imrich Chlamtac, CREATE-NET, Italy

Co-Chair:

Kostas Pentikousis, VTT, Finland

Organizing Committee

General Chair:

Kostas Pentikousis, VTT, Finland

Technical Program Committee Co-Chairs:
Oliver Blume, Alcatel-Lucent Bell Labs, Germany
Ramon Aguero, University of Cantabria, Spain
Symeon Papavasileiou, National Tech. Uni. of Athens, Greece

Web Chair: Jarno Pinola, VTT, Finland

Technical Program Committee

Ramon Aguero, University of Cantabria, Spain Toufik Ahmed, University Bordeaux 1, France

Nadeem Akhtar, CEWiT, India

Hussein Badr, Stony Brook University, USA

Oliver Blume, Alcatel-Lucent Bell Labs, Germany

Roksana Boreli, NICTA, Australia

Eryk Dutkiewicz, Macquarie University, Australia

Jochen Eisl, Nokia Siemens Networks, Germany

Stewart Fallis, BT Plc, UK

Raffaele Giaffreda, CREATE-NET, Italy

Jussi Kangasharju, University of Helsinki, Finland

Theo G. Kanter, Mid-Sweden University, Sweden

Timotheos Kastrinogiannis, National Tech. Uni. of Athens, Greece

Zhaojun Li, Fujitsu Labs, UK

Emmanuel Lochin, ISAE - LAAS-CNRS, France

Symeon Papavasileiou, National Tech. Uni. of Athens, Greece

Kostas Pentikousis, VTT, Finland

Henrik Petander, NICTA, Australia

Miguel Ponce de Leon, Waterford Institute of Technology, Ireland Anand R. Prasad, NEC Corporation, Japan

Susana Sargento, University of Aveiro, Portugal

Csaba A. Szabo, Budapest Uni. of Tech. and Economics, Hungary

Haitao Tang, Nokia Siemens Networks, Finland

Rolf Winter, NEC Network Labs, Germany

Jukka Ylitalo, Ericsson Research, Finland
